Tremendous Activity Throughout the General List.

The Ticker Unable to Keep Pace With the Denlings-Speculation of a Wild Character, With a Trend Toward Higher Values-Sharp Advances in Most of the Rallways.

NEW YORK Dec. 20 .- This was another day of broad and active speculation with prices at times advancing with unusual rapidity. The price movements were so pronounced and wide that at intervals the speculation was wild, and has hardly been surpassed at any time since election levels. Toward the close there were day. The ticker could not keep pace with day. The ticker could not keep pace with the dealings and market orders were frequently executed 1 per cent away from quotations on the tape.

The stock of many minor railroads became active under the influence of the tremendous buying movement, and prices were marked up with surprising case The news developments of the day were not especially significant. There were many rumors of impending railroad deals and the unofficial statement that the Northern Pacific contemplated retiring the preferred shares led to a 7-8 per cent advance and a consequent squeeze of the shorts.

Missouri Facific, Pere Marquette pre-ferred and other stocks were also in ac-tive demand and substantially higher on unconfirmed dividend rumors. The Van-derbilt companies met and declared the usual dividends. It is worthy of note that accompany in the present bold spec-ulation in railroad shares gross earn-ings are now affording much encourage-

Many of the returns for the first week of December contain the proportion of three gains to one loss, with an average net expansion of between 3 and 4 per cent. The second week will likely make a better showing than the first. London today traded in about 50,000 shares and bought on balance. Foreign business was handi-caped by trouble with the English cables. The Bank of England did not advance its

The Bank of England did not advance its minimum rate of discount, as was expected in some quarters, but the aggressiveness of the Boers depressed the London market, with the exception of Americans, which followed the lead of New York. Call money was a shade easier today, and foreign exchange was without feature. The banks continue to gain heavily from the Sub-Treasury.

Notwithstanding the fact that the London quotations were irregular, the local

Notwithstanding the fact that the London quotations were irregular, the local market derived encouragement from the failure of the Bank of England to advance its rate. First prices showed general gains and the volume of business centinued on a heavy scale with the dealings widely distributed. Heavy realizing caused many small reactions and traders were disposed to offer stocks in expectation of a more pronounced setback than has yet developed. The leader in the carly activity was Sugar Refining, which advanced on rumors regarding a buil pool and an agreement of conflicting refining

IMMORAL SUASION.

It Has Certain Advantages Over The Milder Moral

Method.

Moral suasion, the appeal to the ra-tional nature of man, is doubtless a very

good thing. But it will not compare with immoral suasion for inducing swift-

mess of thought or promptness of action.

The burglar surprised in his raid and requested to "please go away" will argue the case in the forceful burglar

y. But when a pistol is pushed in face with the laconic order, "Get!"

-he goes and stands not on the order of his going. The pistol, with its six solid

arguments, is a wonderful persuader, and

As each group of stocks has been taken grangers and Eries were the active stocks during the last hour. They were uniformly strong, and there was notably good buying of St. Paul. Northern Pacific, and the Eries, the latter recording new high price

Chesapeake and Ohio, Northern Pacific, and the Eries were notably strong. The Vanderbilts and grangers were inclined to dullness. Glucose declined abruptly on announcement of new competition. General Electric advanced two points on a few purchases.

After the first hour the market developed a fresh burst of strength in all departments, with heavy buying for both accounts. Northern Pacific was the leader, and was marked up rapidly on buying for powerful interests. This movement was emphasized by a considerable short interest and the presence of numerous stop orders. There was a trensendous realizing orders. There was a tremendous realizing on the advance, but the power of resistance shown by the market was remarkable. not secure the last eighth of possible profits. On sharp reactions people with good margins will buy stocks in again, in up, commission house buying has swung the confident belief that whatever the really needed no stimulus. The Pacifics, immediate market may be there will be further advances during the first quarter of the new year.

The big advances were all made in the early part of the day, and during the last hour there was a sharp reaction in most securities that had been especially strong. One theory regarding this break is that it denoted the beginning of a selling movement in preparation for the holidays. Money borrowed today will have to be paid for until next wednesday, and even although the call loan rate has continued easy the prospect of this will induce many to sell out. Aside from this one factor and the sharp advances already made this and the sharp advances already made this week the situation is bullish everywhere. Intrinsic conditions are well nigh per-fect. London is bullish and was a heavy fect. London is bullish and was a heavy buyer of stocks yesterday. The Bank of England discount rate was not advanced yesterday, as many had expected. The bank statement tomorrow is expected to be a good one, as the banks have not lest any money this week. The Vanderbilt meetings this week have not as yet developed anything startling, but they have all disclosed an excellently sound condition of things. The outlook for money at the beginning of the year is excellent. Railway earnings continue to increase. The way earnings continue to increase. The reports of the steel companies at the be-ginning of the year will be fine. The com-pleted foreign trade statistics for 1900 will be the most wonderful on record. So the story might be continued indefinitely.

Sugar was a new aspirant for sprint-ing honors in the present market. It was more active and buoyant than at any time since the dividend was reduced. The opening was at 131, and on immense buy-ing it was shot up to 133.7-8. During the last ten minutes of the day it fell back to hast ten minutes of the day it fell back to below the opening price. It would seem entirely likely that the movement once begun in Sugar might continue, though it is a stock governed by no rules ex-cept the whims of the Havemeyer crowd. Some announcement regarding the ending of the Sugar war would not surprise the

St. Paul was buoyant, apparently in sympathy with the Northern Pacifics, to a certain extent, though an upward move-ment has been looked for at any time. The top price reached was 134, at which there was a gain of more than 21-2 points from the opening. The close was a. 1321-8. Burlington advanced to above 140, and Rock Island to H9. The Atchisons made small gains early in the day, but closed with no advance. They were a distinct disappointment. There is talk of valuable "rights" soon to be given to Burlington.

activity was Sugar Refining, which advanced on rumors regarding a buil pool and an agreement of conflicting refining interests. Illinois Central, Denver and Rio Grande preferred, Wheeling and Lake Erie first preferred. Missouri Pacific, unhealthy market, it was styled by others unhealthy market, it was styled by others in the upward movement. They even closed with small losses for the day. Many careful people express the opinion that the boom is not likely to culminate until this group has had an advance. Some of the stocks in it are among the best in the entire list as far as intrinsic merit is concerned. The January re-ports of the companies will be fine.

Amalgamated Copper tumbled from General Electric advanced to 183, another new high price, and closed at the

him to do so.

"I have been thinking of writing to you for some time," writes Mrs. W. D. Benson, of Maxton, Robeson Co., N. C., "to let you know what a wonderful thing Dr. Pierce's Golden Medical Discovery did for my little boy. He was taken with indigestion when he was a year and a half old, and he was under

the doctor's treatment for five long years. We spent all we made for doctor bills, and it did no good. When he would take a spell of indigestion he would lie for ten and fifteen days, and it seemed as though he would die. He had these spells every two or three weeks. He could not eat anything only a little milk and cracker, and sometimes a little milk and cracker, and sometimes even this would make him sick. He even this would make him sick. He could not eat any meat or vegetables and he got very weak; could not sit up all day, and I gave up all hope of his ever getting any better. Three years ago I found one of your books, and on looking it over one day I noticed Dr. Pierce's Golden Medical Discovery recomended for indigestion. We bought some and gave it to our boy. He had been treated at Hood's Creek by a good doctor, and at Bennettsville, S. C., and at Currie, and Lumberton and Maxton, and was only relieved for a short time and was only relieved for a short time. We gave him two bottles of Dr. Pierce's

Golden Medical Discovery and it cured him. He is well as can be and can eat anything that be wants and it does not hurt him. He has not been sick a day since and it has been

innutrition are cured writes Mrs. J. Ellis Hamilton, of Farm-ington, Marion Co., West Va. "I stated my case as plainly as I could, and re-ceived a letter from you in a few days, telling me to use Dr. Pierce's Golden Medical Discovery and 'Favorite Pre-scription'—a bottle of each. I used three of each, and feel like a new woman. Don't suffer any pain or misery any more. Before using your medicines I suffered all the time—had jaundice, caused from food not digesting properly. I would have sick headache three and four times a week, and jaundice every four or five weeks. Could not do the work myself. I commenced using your medicines as recommended liver complaint, and I am cured I doctored three years without relief, only for a short time, and then I was as bad as ever. Haven't had sick headache since I took the first bottle of medicine."

There is no alcohol in "Golden Medical

The table of contents, of Dr. Pierce's The table of contents, of Dr. Pierce's Common Sense Medical Adviser, offers a wide range for the thoughtful or the curious reader. In the roof large pages of this remarkable book have been condensed the sum of human knowledge upon the vital truths of biology, physi-ology and hygiene. It is full of help-ful household hints on home medicine and treatment. Among its 700 illustra-tions are pictures of medicinal herbs and tions are pictures of medicinal herbs and instructions as to their value and preparation for use. The book is a mine of valuable knowledge, and it is sent absolutely free on receipt of stamps to pay expense of mailing only. Send 31 one-cent stamps for the cloth-bound volume, or only 21 stamps for the book in paper-covers. Address Dr. R. V. Pierce, Butfalo, N. Y.

Home Method That Restores No Matter How Bad the Case.

Welcome Advice From a Well-Known New York Specialist.

yellow on wharf sold at 435/46c and a small lot white at 44c.

Western wheat today opened dull and easy; December, 71 3-46/32c. Rather sicadier public cables and bullish sentiment in the West held prices very firm. Cash wheat continues in demand, but is in small supply, sales being made at 72c and 72:1-4c; January selling at 72:3-4c; May was nominal at 77c. Private cables extremely dull. Market closed steady; Spot and December, 72:1-8c bid; January, 72:2-4c bid, 73c assked May, 77c bid, Sales, two cars fresh spot, 72:1-4c; two cars spot, 72c; 5,500 fresh spot, 72:1-4c; 10,000 January, 72:3-4c. Settling price, contract, 72:1-8c; No. 3 red, 63 7-8c; steamer No. 2 red, 69 5-8c.

Western corn today was dull and casy while demand for spot continues this defended and any other solid part of me. I was cured sound and well."

Heurich's beers are unsurpassed and are everywhere recognized as the purest and most whole some of all beverages. The fact that the best malt and bogs are used in hewing Maerren, Senate, and Lager has won them the highest reputation as a beer of pure qualities. Phone 52t, Arlington flottling Co., for a case.

prospects of profit, have appeared in previous issues of The Times.

The following are extracts from letters received by the company from users of the CAHILL ELECTRICAL TYPEWHITERS in Government, railway, and private offices in Washington and Baltimore. The originals of these letters and others may be seen at the office of the Company, 1311 F Street, where intending investors are invited to call.

Mr. Arthur M. Travers,

Private Secretary to the Third Assistant Postmaster General, writes:
Of course, I have used your machine but very little as yet, but it does not take long for anyone to see that it offers advantages which the other machines cannot possibly offer their users. It has a lighter touch than any other machine can possibly have, and in the past this has been considered the great thing to be desired in a typewriter. The regularity of work and the ability to do heavy manifolding as easily as one copy was something that I think operators did not expect ever to realize.

In the great points which make a typewriter—and especially in those which burden or relieve the operator—your machine has produced a revolution, and I am sure that operators will be quick to appreciate anything that makes their work easy.

Mr. R. E. Logan,

Stenographer in the Navy Department, says:

Though I have used the Remington constantly for a dozen years or more, I was able to take up your Electrical Typewriter and do all my work on it the very first day. On the second or third day I had a lot of copying to do, and was surpaised to find how rapidly I was turning off the pages. I was sliding along at an increased rate of speed without knowing it until I had finished the work.

The tonch upon your typewriter is exactly what all the operators have been looking for, and is so light, easy, and speedy that anyone who has used the machine would, I believe, never be content with any other. Although a beginner on your machine, the work it turned out for me was finer than that done on any of the several other kinds of machines in our office, and at sight won the admiration of the people who knew nothing about the machine itself. I believe you have the best typewriter on the market, and it is a better one than I ever expected to see.

The "Simplex"

The following refer to the "Simplex," or piano keylourd electrical typewriter, operated by one hand only:

Miss Ida W. Hunt.

Stenographer to the President of the Equitable Co-operative Building Associa-

Mr. Tracy E. Mulligan,

Typewriter.

Mr. John G. Rockwood. Stenographer to the Chief Clerk of the War Department, says:

After operating and thoroughly testing one of your Electrical Typewriters, it gives me pleasure to testify to its merits. The unparalleled speed, together with the marvelous ease of manipulation and high manifolding power, will. I am confident, cause it to revolutionize the construction of typewriting machines.

Mr. A. M. Smith,

Stenographer to the Purchasing Agent of the Southern Railway Company, writes:

the market.

To the operator it is especially desirable on account of its light, elastic touch and the case with which a great number of carbon copies may be made—this latter feature making the CAHILL, beyond comparison with other machines.

Any operator who has once tried this machine will be very loath to return to the use of the old-style machines.

Miss M. M. Westafer, Stenographer to the Secretary of the In-terior, says;

After having used for a number of years a typewriter long regarded as the best on the market, I began to operate the Electrical Typewriter, and found, to my surprise, that I could do a maximum amount of work with a minimum of labor. I am sure that every operator who acquaints himself with your machine will prefer it to any other. I comider it superior to any machine I have used.

Mr. Haymond Blanton,

Stenographer, Supervising Architect's Office, Treasury Department, writes:

I have used your Electrical Typewriter for several months and am very much pleased with it, indeed, in case of operation and speed it is far ahead, I believe the electrical aid to the operator will work a waving of from 25 to 50 per cent of the fatigue ordinarily incident to a day's typewriting with a non-electrical machine. IN FACT, RATHER THAN USE ANY OTHER TYPEWRITER, I WOULD PREFER TO FURNISH THE CAHILL AT MY OWN COST.

Mr. G. E. Lamb,

Biscuit Company, Beltimore, Md., says:

I take great pleasure in saying that my
experience with your Electrical Typewriter has been most satisfactory, and I
do not hesitate to say that anyone once
learning to write with it would dislike
very much to go back to the old machine. The longer I have it the better
I like it, and am convinced that it is the
coming typewriter. It does so much better work and has so many advantages ever
the old machines that it is bound to become very popular as soon as it becomes
known. Anyone could write all day on
the electric machine without get ing the
least bit tired or nervous, which, to my
mind, is sufficient recommendation to self
any typewriter.

Mr. Allen Diehl Albert, Jr.

Correspondent of the Baltimore Sun, says: Correspondent of the Baltimore Sun, says:

All day I have been operating the typemeritor of symr make now in the District
Building. It happened I cut my left hand
very badly yesterday morning and at once
gave up all hope of desing any newspaper
work until the wound should heal. But
some one at the District Building offered
me a machine "warranted not to open the
wound," and I was thus introduced to the
typesyster of which I have heard so much.

I thought you would be interested to
know the result. Well, I have been writing all day long and my lame hand has
not suffered a particle. The most wonerful thing, however, is that with one
hand disabled I have been able to do a
full day's work without thing myself as
much as when I have both hands to work
with on a non-electric machine.

SUBSCRIPTIONS will be received to

Reom 14, Central National Bank Building, says:

In my experience of over four years at typewriting I have operated several non-electrical machines, including the Remington, and have found nothing which can approach the Simplex for the qualify and quantity of work which it is capable of doing. The simplicity of the keyboard obviates the necessity of looking at it and enables the operator to devote his entire time to his notes—thus increasing his speed. When once accustomed to the touch and manipulation of the electrical machine it is like handling a pick and shovel to return to the non-electrical typewriters.

I regard it as a luxury, compared with which the non-electrical machines will remain a necessity only until the public generally become acquainted with the many merits of your invention.
